

Colours By Nature

Specialists in natural paints and building products

www.coloursbynature.com.au

Colours By Nature is a prime supplier of natural paint, finishing oil and building products. Established in 1997, we are an active and respected business in the natural and environmental products market, with extensive knowledge and experience in the application of the natural finishing products and accessories. Our range is primarily organically plant sourced, which provide for a non-toxic, low or nil solvent, carbon neutral, sustainable and environmentally friendly product.

Our strengths are built around providing the best products, with the best service at Australia's best pricing. In today's eco-friendly market – it makes eco-sense to partner with Colours By Nature!

PRODUCTS

Colours By Nature offers a comprehensive range of the leading natural paint, and building products. Our sole purpose is to provide an alternative to the man-made product range. We are proud to stock the following lines:

PAINTS

BIO provide a healthy alternative to conventional products with a range of interior and exterior paints, varnishes, enamels, oils, waxes and adhesives. These Australian manufactured products are predominantly made from naturally imported ingredients and do not contain any harmful or toxic substances. Therefore it causes no damage to man or the environment and is low allergenic. BIO paints, varnishes, lacquers, oils and waxes are amongst the most environmentally friendly products on the market. They have been developed since the early seventies in response to increasing concerns about the environmental impact of man-made chemicals. They have taken great care to select modern ingredients, which compliment the original formulas and minimise the risk of adverse effects on everyone. A full colour chart and product list is available upon request

VOLVOX offers a collection of paints, stains and waxes that is made primarily from naturally-derived raw materials including citrus peel extracts, essential oils, seed oils, tree resins, inert mineral fillers, tree and bee waxes, lead-free dryers and natural pigments. With Volvox products, you no longer have to wonder what combinations of synthetic chemicals generate the puzzling, all-too-familiar smells that come from household products and the range is largely VOC-free and water based.

The mild fragrance that is unique to Plant Based Paint products will enhance any painting, finishing, and cleaning activities, and help to create a serene environment at your home, business, or school.

Volvox Clay Décor is a solvent free, non-drip, long-lasting interior wall and ceiling paint which can be applied to most interior surfaces such as Gyprock, timber, masonry, brick and fibre cement without priming. Clay Décor can be used exterior in frost free regions and water protected areas. VOLVOX Clay Decor is permeable to vapour and absorbs variations in humidity providing a more comfortable and healthy living environment. Due to its high proportion of solids VOLVOX Clay Decor covers exceptionally well (99.55%).

VOLVOX ProAqua Transparent Wood Finish is V.O.C. free, water based, non-drip, and long lasting wood finish for interior and exterior use. Available in transparent wood colours of Natural (exterior only) Clear (interior only), Pine, Walnut, Oak, Mahogany, Teak, White, Ebony, Citrus, Yellow, Corn Yellow, Oriental Red, Meadow Green and Mondrian Blue. The ProAqua Clear can be tinted to match your individual colour scheme. A full colour chart and product list is available upon request

VOLVOX ProAqua Wood Transparent Finish Mahogany

LIVOS supplies a large range of plant based non-toxic products for various surfaces which includes, floor and furniture oils for the sustainable care of timber; priming oils for preserving without health risks; exterior oils for the natural nourishing and enhancing of timber decks, fences and furniture; cleaners, waxes and maintenance products for the responsible care and maintaining of various surfaces; paints, tints and primers for non-toxic wall decorations. LIVOS paints are safe to use and do not emit harmful fumes; thinner for diluting and safer cleaning; natural make-up and finger-paints for children and adults for a safe creative experience. Made without harmful chemicals, LIVOS products contain only biologically and environmentally responsible ingredients, grown without the use of pesticides. A full colour chart and product list is available upon request.

FOOD

KIALLA PURE FOODS is one of the largest organic cereal grain processing operations in Australia. Established in the late 1980's many years of reliable organic production has forged Kialla a hard earned reputation for professionalism and integrity, both locally and in international markets. At Kialla only 100% certified GMO free organic cereal grains are produced with no cross contamination from non-organic grains.

AUS ORGANIC ANIMAL FEEDS is Kialla's sister company. It utilises gradings and out of spec grains, as well as milling by products to manufacture a range of organic stock feeds. The key benefit of utilising by product is the consistency of ration produced – Aus Organics ration formulations are not impacted as much by the seasonal supply fluctuations, therefore it can produce a relatively consistent ration all year round. It supplies feed for the poultry, beef, lamb and dairy industries in bulk, bulka bag or 25kg bags. Other rations are available upon request or formulated to customer requirements.

INSULATION

Colours By Nature selected Higgins Natural Wool Insulation Batts for our very first Natural Paint storage facility in south-eastern NSW. At this location we typically experienced temperature variations from eleven (11) degrees Celsius in winter to forty (40) degrees Celsius in summer. We were so impressed with the quality and performance of the range of insulation available that we have are now proud suppliers of the Higgins eco-range of insulation.

Higgins Insulation's strong [environmental credentials](#) ensure every endeavour is taken in the manufacturing process to reduce pollution and minimise the carbon miles associated with the negative environmental effects of long-haul transportation.

THE NEXT STEP
